La mondialisation	1,
est un processus croissant de libre circulation des biens, des capitaux, des services, des personnes, des technologies et des informations. Il a pris de plus en plus d'importance grâce aux progrès des technologies de transport et de communication. La mondialisation a un impact sur de nombreux secteurs, en particulier le commerce et l'économie, mais aussi sur l'échange d'idées, de valeurs et la culture.	
Le protectionnisme	2,
est la politique économique qui consiste à limiter les importations en provenance d'autres pays ou groupes de pays par le biais de méthodes telles que les droits de douane sur les marchandises importées, les quotas d'importation et diverses autres réglementations gouvernementales.	3,

Technical Specifications

Between the 17th June and the 17th July 2022, Kantar Public on behalf of Kantar Belgium carried out the wave 97.5 of the Eurobarometer survey, on request of the European Commission, Directorate-General for Communication, "Media monitoring and Eurobarometer" Unit.

The wave 97.5 includes the Standard Eurobarometer 97 survey and covers the population of the nationalities of the European Union Member States, resident in each of the 27 Member States and aged 15 years and over.

The Standard Eurobarometer 97 survey has also been conducted in 12 other countries or territories: five candidate countries (Albania, Montenegro, North Macedonia, Serbia and Turkey), the Turkish Cypriot Community in the part of the country that is not controlled by the government of the Republic of Cyprus, as well as in Bosnia and Herzegovina, Iceland, Kosovo¹³, Norway, Switzerland and in the United Kingdom.

In these countries and territories, the survey covers the national population of citizens and the population of citizens of all the European Union Member States that are residents in these countries and territories and have a sufficient command of the national languages to answer the questionnaire.

The basic sample design applied in all countries and territories is a multi-stage, random (probability) one. In each country, a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density.

In order to do so, the sampling points were drawn systematically from each of the "administrative regional units", after stratification by individual unit and type of area.

They thus represent the whole territory of the countries surveyed according to the EUROSTAT NUTS II (or equivalent) and according to the distribution of the resident population of the respective nationalities in terms of metropolitan, urban and rural areas¹⁴.

In each of the selected sampling points, a starting address was drawn, at random. Further addresses (every Nth address) were selected by standard "random route" procedures, from the initial address. In each household, the respondent was drawn, at random (following the "closest birthday rule"). If no one answered the interviewer in a household, or if the respondent selected was not available (not present or busy), the interviewer revisited the same household up to three additional times (four contact attempts in total). Interviewers never indicate that the survey is conducted on behalf of the European Commission beforehand; they may give this information once the survey is completed, upon request.

The recruitment phase was slightly different in the Netherlands and Finland. In these countries, a sample of addresses within each areal sampling point (1km² grid) were selected from the address or population register (in Finland, selection is not done in all sample points, but in some where response rates are expected to improve). In Finland, where telephone pre-recruitment was used, selection was done at a ZIP code level and not a 1km² grid level within the selected LAU. The selection of addresses was done in a random manner. Households were then contacted by telephone and recruited to take part in the survey. In the Netherlands, a dual frame RDD sample (mobile and landline numbers) are used. The selection of numbers on both frames is done in a random manner with each number getting an equal probability of selection. Unlike Finland, the sample is un-clustered.

¹³ This designation is without prejudice to positions on status, and is in line with UNSCR 1244/99 and the ICJ Opinion on the Kosovo declaration of independence.

¹⁴ Urban Rural classification based on DEGURBA (<https://ec.europa.eu/eurostat/web/degree-of-urbanisation/background>)

CAPI : Computer-Assisted Personal interviewing
CAWI : Computer-Assisted Web interviewing

Consequences of the coronavirus pandemic on fieldwork

■ Face-to-face interviewing

Where feasible, interviews were conducted face-to-face in people's homes or on their door step and in the appropriate national language. In all countries and territories where face-to-face interviewing was feasible CAPI (Computer Assisted Personal Interviewing) was used.

For all interviews conducted face-to-face, hygiene and physical distancing measures have been respected at all times in line with government regulations, and whenever possible, interviews were conducted outside homes, on doorsteps, to remain in open air and maintain social distance.

■ Face-to-face and online interviewing

In Belgium, Czechia, Denmark, Estonia, Latvia, Lithuania, Malta, Netherlands, Slovenia, Slovakia and Finland face-to-face interviewing was feasible but it was not possible to reach the target number of face-to-face interviews within the fieldwork period due to the impact of Covid-19 restrictions: many potential respondents are reluctant to open their homes to interviewers, even if they respect hygiene rules and physical distancing, such as

wearing masks and using hydroalcoholic gel. Therefore, to hit the target number of interviews within the fieldwork period, **additional interviews** were conducted online with Computer-Assisted Web Interviewing (CAWI) technique.

■ Online interviewing

In Sweden, Iceland, Norway and Switzerland face-to-face interviews were not feasible at all. Therefore all interviews were conducted online with CAWI technique.

Recruitment for online interviews

■ In the EU

The online design in each country differed based on what was feasible within the fieldwork period. Where feasible, the online sample was based on a probabilistic sample design. Those recruited to the online survey were recruited through a single mobile frame or dual frame Random Digit Dialling (RDD) design. In this way the entire phone owning population in each country had a non-zero chance of being sampled. The choice of whether to use a single mobile frame or dual frame (mobile and landline) was dependent on the countries' landline infrastructure. Where the landline infrastructure is suitably advanced to support a significant minority of residential households with landline phones a dual frame design is employed. The mix of mobile and landline sample is designed to maximise the representation of the responding sample. The RDD sample for both the mobile and landline sample is drawn from the country's telephone numbering plan. The landline sample frame is stratified by NUTS3 regions based on their prefix and the mobile by operator before a systematic random sample of numbers is generated proportional in size to the total generatable numbers in each stratum. Respondents were recruited using this sample design in **Belgium, Czechia, Estonia, Latvia, Lithuania, Malta, Slovenia and Slovakia**.

In **Finland, Denmark, and Sweden**, RDD samples were not used, instead the telephone sample was drawn from the country telephone directory. In these three countries the telephone directories offer comprehensive coverage of the phone owning population, storing both landline and mobile phone numbers for each individual.

In the **Netherlands**, two survey modes were used to collect responses, face to face and online. For the online mode, the respondents were initially recruited to take part through an offline mode of recruitment via a probability-based dual frame overlapping RDD sample design. In this way the entire phone owning population in the Netherlands had a non-zero chance of being sampled. The mix of mobile and landline sample is designed to maximise the representation of the responding sample. The RDD sample for both the mobile and landline sample is drawn from the country's telephone numbering plan. The landline sample frame is stratified by NUTS3 regions based on their prefix and the mobile by operator before a systematic random sample of numbers is generated proportional in size to the total generatable numbers in each stratum.

Standard Eurobarometer 97 Summer 2022

■ Outside the EU:

In **Norway** and **Iceland**, stratified random samples were drawn from among probability based samples. Recruitments are done using offline modes of data collection (telephone and postal) based on a probability sample design.

In **Switzerland** samples were randomly drawn from the non-probabilistic sample ("Demoscope"). Demoscope is a pseudo-probabilistic sample, in that the frame for selecting households is based on a probability sample. Recruitment is done via the telephone directory – which lists landline numbers only in Switzerland, where landline coverage is very high. However the selection of individuals in the households to join the panel is not random. Demoscope was used as the primary source.

Response rates

For each country a comparison between the responding sample and the universe (i.e. the overall population in the country) is carried out. Weights are used to match the responding sample to the universe on gender by age, region and degree of urbanisation. For European estimates (i.e. EU average), an adjustment is made to the individual country weights, weighting them up or down to reflect their 15+ population as a proportion of the EU 15+ population.

The response rates are calculated by dividing the total number of complete interviews with the number of all the addresses visited, apart from ones that are not eligible but including those where eligibility is unknown. For Standard Eurobarometer 97, the response rates for the EU27 countries, calculated by Kantar, are:

	COUNTRIES	CAP Response rates	CAWI Response rates
BE	Belgium	56.7%	17.5%
BG	Bulgaria	47.3%	
CZ	Czechia	50.7%	39.8%
DK	Denmark	43.3%	20.2%
DE	Germany	22.8%	
EE	Estonia	39.6%	21.9%
IE	Ireland	47.1%	
EL	Greece	29.0%	
ES	Spain	34.1%	
FR	France	33.0%	
HR	Croatia	42.8%	
IT	Italy	23.8%	
CY	Rep. Of Cyprus	47.4%	
LV	Latvia	48.2%	19.7%
LT	Lithuania	43.2%	23.2%
LU	Luxembourg	21.7%	
HU	Hungary	63.6%	
MT	Malta	79.6%	35.4%
NL	Netherlands	66.4%	42.3%
AT	Austria	44.2%	
PL	Poland	48.6%	
PT	Portugal	39.6%	
RO	Romania	62.7%	
SI	Slovenia	49.7%	34.5%
SK	Slovakia	65.5%	19.0%
FI	Finland	38.4%	29.7%
SE	Sweden		25.5%

CAP : Computer-Assisted Personal interviewing

CAWI : Computer-Assisted Web interviewing (CAWI RRs do not include the recruitment phase)

Standard Eurobarometer 97 Summer 2022

Margins of error

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage.

With samples of about 1,000 interviews, the real percentages vary within the following confidence limits:

Statistical Margins due to the sampling process

(at the 95% level of confidence)

various sample sizes are in rows

various observed results are in columns
